

Ergopedic

Ergopedic reduces pressure and provides a reduction of heat build up, whilst benefiting blood circulation. It is the perfect option for users with back issues, or requirements for long periods of sitting.

What is Visco overlay?

Also known as memory foam, Visco overlay was developed in 1966 by NASA to improve the safety of aircraft cushions. Visco foam reacts to body heat allowing it to mould to a warm body in a few minutes and then returning to its original shape once weight is removed. Memory foam increases blood flow to regions of the body alleviating pressure sores.
