UR™ Table

UR™ is an environmentally considered table system that is flexible and versatile and also provides a complete 'family' of table product options.

Features

- * UR™ offers a family of products which provides for continuity of design throughout a space.
- * UR™ can accommodate tables and desks with a variety of top widths and to an infinite length.
- * Large boardroom tables can be created using the UR™ multi-leg configuration.
- * UR™ Folding tables come standard with an optional linking system so tables can be joined together.

Environmental Features

* UR™ has been designed with the environment in mind. Life Cycle Assessment (LCA) were commissioned to determine the most appropriate materials to achieve the desired finishes. Components produced from materials such as die cast aluminium have been designed using Finite Element Analysis (FEA) to ensure the strongest structure whilst eliminating excess material.

* UR™ is a carbon neutral product.

* UR™ table base has been designed for 100% disassembly, ready for recycling.

Options

- * UR™ standard finishes are chrome or black posts with polished aluminium feet.
- * UR™ offers three different foot sizes to accommodate tables from 600mm deep to 2100mm wide.
- * UR™ optional mesh modesty panel provides privacy.
- * UR™ offers an optional work top support system that is sold separately to allow small work surface pieces to be joined to existing tables creating additional space in training situations and temporary work areas. The system is sturdy and easy to assemble, with components manufactured from steel and a high grade plastic for improved load capacity.
- * UR™ folding tables provide a tilt top nesting table for workplaces that demand flexibility and reconfiguration.

Available Ranges

- * 5 Star base
- * 4 Star base
- * Rectangular
- * Folding table
- * Multi - leg

Certifications

- * GECA Certified
- * ISO 14001
